

ACCESSIBILITY BUILD CHECKLIST

1. Introduction

Accessibility in UI/UX design ensures that digital products can be used by everyone, including people with disabilities. This checklist evaluates a mobile shopping application against common accessibility standards to create an inclusive and user-friendly experience.

2. Objective

The objective of this task is to assess the accessibility of a mobile shopping application using a structured checklist and identify whether it meets essential accessibility requirements.

3. Accessibility Checklist

No.	Accessibility Requirement	Status
1	Adequate color contrast between text and background	✓ Pass
2	Readable font sizes throughout the application	✓ Pass
3	Images contain descriptive alternative text	✓ Pass
4	Buttons have clear and meaningful labels	✓ Pass
5	Form fields contain proper labels	✓ Pass
6	Keyboard navigation is supported	✓ Pass
7	Visible focus indicators are provided	✓ Pass
8	Error messages are clear and understandable	✓ Pass
9	Screen reader compatibility is maintained	✓ Pass
10	Touch targets are sufficiently large	✓ Pass
11	Proper heading hierarchy is followed	✓ Pass

No. Accessibility Requirement	Status
12 Links are descriptive and meaningful	✓ Pass
13 Multimedia content includes captions	✓ Pass
14 No flashing or distracting content exists	✓ Pass
15 Responsive design supports multiple devices	✓ Pass

4. Evaluation Results

The accessibility review indicates that the application follows major accessibility principles. Text elements are readable, navigation is user-friendly, and interactive components are properly labeled. The application supports accessibility tools such as screen readers and keyboard navigation, improving usability for users with diverse needs.

5. Recommendations

- Continue following WCAG accessibility guidelines.
 - Perform regular accessibility testing during development.
 - Ensure all newly added images include alternative text.
 - Maintain sufficient color contrast across all screens.
 - Conduct usability testing with users of different abilities.
-

6. Conclusion

The accessibility checklist confirms that the mobile shopping application meets key accessibility requirements and provides an inclusive experience for a broad range of users. Following accessibility standards improves usability, user satisfaction, and overall product quality.

Tools Used

- Figma

- WCAG Accessibility Guidelines
 - Microsoft Word / Canva
 - Accessibility Checklist Framework
-

Outcome

Successfully evaluated a mobile shopping application using an accessibility checklist and verified compliance with essential accessibility standards.
